REMARKS

Figure 2 as-filed has been objected to as lacking sufficient quality to permit examination. In particular, the Examiner suggests that the individual wells are not so labeled as to ascertain which contain treated versus control, if any.

Accordingly, in an earnest effort to advance the prosecution of this case, Applicants are submitting herewith a replacement Figure 2 with the control groups, C, Ac (denoting controls treated with acetone) and DM (denoting controls treated with N,N-dimethylformamide), as well as treated groups denoted by three digit numbers, more clearly labeled. These newly typed labels, while difficult to read in the originally filed figure, clearly correlate with the handwritten labels of the originally filed figure. Thus, now new matter is added by this amendment. Entry is therefore respectfully requested.

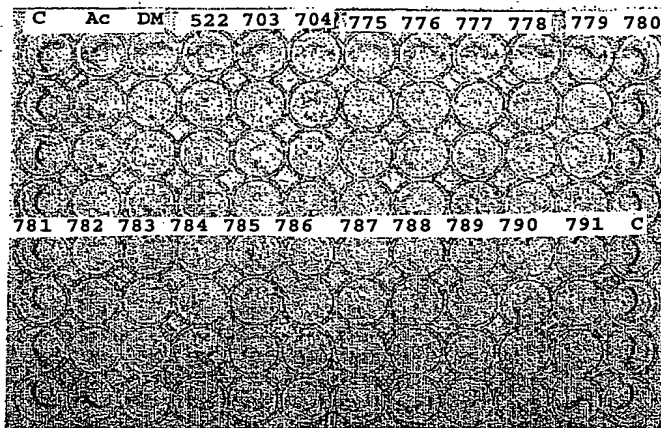

Respectfully submitted,

Kathleen A. Tyrrell
